Vinay V P *Product Manager*

vinayamin1997@gmail.com Bengaluru, India 8217866171 vinayvp/ portfolio

PROFILE

Product Manager with a strong **engineering foundation** and 5 years of hands-on experience transforming slow & cluttered operational systems into **automated intelligence products**. **Proven performer** in high-pressure national election environments where data quality and rapid delivery drive strategy daily. Known for owning product outcomes end-to-end: **problem discovery → UX → sprint execution → change adoption**. Passionate about **AI-assisted analytics**, workflow automation, and building scalable internal tools that **remove bottlenecks permanently**.

SKILLS

Product Management: Product Strategy, Roadmapping, Prioritization, Problem Discovery, Delivery Ownership

Data & Engineering: Python, JavaScript, SQL, MongoDB, FastAPI, Django, GitHub Workflows, CI/CD, ReactJS

AI & Automation: RAG, MCP, n8n Flows, AI CLI Tools, Slack/Google AppScript Automation, LangChain, LangGraph, LangChain MongoDB Agent Toolkit

Collaboration & Process: Figma, Jira, Notion, Agile, SOPs, Release Management

PROFESSIONAL EXPERIENCE

Varahe Analytics Pvt. Ltd. 2023 – present | Bengaluru, India

Product Manager

- Owned election-tech product outcomes across multiple states, aligning field user needs with engineering priorities.
- Automated a recurring manual reporting task, saving hours daily and reducing delivery errors.
- Built a live voter turnout data solution from scratch, enabling real-time decision-making.
- Led **PRISM**, an insights platform replacing static PDFs with interactive regional and demographic data exploration—delivered Phase 1 in 6 months.
- Introduced structured releases and Git workflows to improve delivery predictability.
- Currently leading the AI roadmap (**Prism AI**) for natural-language data exploration.
- Contributed to hiring and product storytelling to support company growth.

MLC elections - Karnataka South-West Graduates Constituency 2024 2024 | Shivamogga, India

Technical Head - Backend & Strategy

- Built and deployed a **constituency-scale voter data platform** from scratch, enabling ground teams to capture and refine insights across **85,000+ registered voters**
- Used demographic shifts and sentiment patterns to **shape campaign narratives** and target micro-segments more surgically
- Ran a **30-member calling operation** - drafted scripts, standardized communication flows, and introduced feedback routing to tighten field intelligence
- Partnered closely with the candidate and campaign leadership - real-time adjustments to the strategy based on fresh data helped **a first-time candidate secure a win**

DeepByte Technology Pvt. Ltd (A repalogic company) 2022 – 2023 | Bengaluru, India

Backend Team lead

- Led backend delivery of analytics platform (TYRIOS), aligned tech choices and release priorities with customer needs.
- Established coding standards / QA checks to improve reliability and release velocity.

Kaleyra 2021 – 2022 | Benagluru, India

Associate Software Engineer

- Shipped messaging features (Bulk/Scheduled SMS), integrated Kaleyra APIs into platforms like Shopify/ Zoho, etc.
- Improved performance & reliability on production pipelines.

Trinity Mobility Pvt. Ltd 2021 | Bengaluru, India

Software Engineer

- Contributed to CAD solution deployed across multiple govt agencies; fixed high-priority security and reliability issues.
- Adapted the application for Cairo, Egypt by addressing language requirements, resolving critical security issues, and fixing high-priority bugs.

KEY PROJECTS

Nitya AI

AI guided spiritual habit tracker - Flutter + Firebase + WearOS app

- **Architected Context-Aware Spiritual Intelligence Engine:** Designed and implemented a **RAG-based (Retrieval-Augmented Generation) AI chatbot** to deliver personalized, scripture-backed guidance, effectively bridging the gap between traditional texts and modern user queries.
- **Engineered Hyper-Local Data Model:** Built the underlying data infrastructure to ingest dynamic inputs (Panchanga, crowd status, amenities) from **100+ temples**, transforming static directory data into actionable, real-time insights for users.

InstaConnect Dashboard (Personal Project)

PM + Full-Stack · MERN + Instagram Graph API(Vibe Coded POC)

- Built a **real-time comment management product** for creators/businesses
- Secure login for Instagram Business Accounts → media + caption + timestamp visibility → **reply to comments directly**
- Designed UX for **fast scanning & actioning** of audience interactions
- Deployed to the cloud with GitHub versioning, demonstrating **full product lifecycle ownership**
